Seminar Title From Research to Recognition:
Publishing, Peer Review, and Visibility in the
Physical Sciences

This seminar offers researchers a practical, end-to-end overview of the scholarly publishing journey—from shaping a strong manuscript and selecting the right journal to navigating peer review, publishing responsibly, and increasing the visibility of published work. Drawing on global best practices in the physical sciences, the session also highlights research integrity, responsible AI use, and strategies for ensuring your research is read, cited, and recognized worldwide.
